NUMBER 39.

VARIOUS KINDS OF COINAGE. Twenty-Six Different Monetary Unita

Twenty-six different monetary units are used by the 48 principal countries of the world. Thus, Great Britain uses the severeign or pound sterling; France and six other countries of Europe use a unit equal to the franc; and Canada and the United States use the dollar. In value these different units range from 4.4 to 494.33 cents of money of the United States. They are represented in their turn by coins the values of which are either multi-ples or are fractional parts of the value of their own chief units, and here are no doubt at least 200 different coins, not one of which eems to have a value equal to that of any commonly known unit of weight as the gram, for example, or the ounce of gold, although 43 of these 48 countries have accepted gold as their standard measure of values. In the colnage of the world there seems, indeed, to be little that is logical or reasonable. Adoption of a single monetary unit or base, if not of an universal system of coinage to be tions, suggests E. W. Perry in Moody's hecause there has been no concerted. remove the evils of the existing dis-

SPLENDID RACE OF MEN. Natives of the Friendly Islands of Magnificent Physique.

The natives of the Tonga, or Friendly islands off the east coas New Zealand, are the finest in physique of any on earth," said E. Powell, of Cleveland. Mr. Powell is returning from a business trip to Australia, where he visited several groups of the Pacific Islands. "The average height of the males is fivefeet ten inches. Many of them are to 300 pounds and are very straight, being built in proportion. The women average a greater height than the women of America. They have fine. strong figures and average from 130 to 160 pounds in weight. They are of copper color, straight haired and famous. I firmly believe they are the original Maoris, while the natives of New Zealand are a smaller race—apparently a mixture with the Mongolian and mostly coral. There is Leither Peace and contentment are in evidence and the tribe is exceeding virtuous. The main article of food is the cocosnut, and the only drink used is the milk of this nut."

It is a debatable question whether it is a wise practice to drink a cupful of hot water immediately upon rising every morning. The hot water fiends fancy that they cannot live without liable physicians who claim that this practice is debilitating to the stomach and that it cannot fail to do injury.

The habitual use of cold water is an excellent habit to form. It is natural to drink cold water. Cold water is a tonic to the stomach, as it is to the skin. It gives tonicity to the mucous walls of the stomach. The practice of taking five or six glasses of cold water a day is a good one. It will help to clear the complexion, brighten the eyes, and is said to be almost a cer-tain remedy for puffness under the

Hot or Cold Water.

A Great Swimmer

еуев.

A remarkable swim by an eightvear-old horse, says a Kildysart telegram, is occupying the attention of the local inhabitants. It appears that farmer named Morgan Macmahon, who lives on a small island in the estuary of the Shannon, took the horse by boat to the mainland, and after working it all day turned it loose in the evening with a number of other horses. When the owner awoke next morning what was his astonishment to find the faithful animal peacefully grazing near its stable. It was wet asfrom a swim, and there is not the slightest doubt that the horse had wum all the way from the mainland to the island a distance of a little less than three miles.—Pall Mall Gazette.

Terms of Latin Origin.

In a legal sense an "innuendo" was originally an averment made by the plaintiff in a libel action, putting into olain words the injurious sense he detected in an insinuation published by the defendant. It is the ablative case of a Latin gerund that has become a common—English—noun—substantive Another Latin ablative with a similar modern history is "folio," which lit-erally means "on page" so-and-so. The English language absorbs all cases in this fashion at its pleasure. is "quorum" (genitive plural and "omnibus" (dative plural), with "ignoramus" as an English noun that was once a Latin verb in the first person plural.

Onlone as Irrigators. A farmer has made a discovery that will be of vast importance to farmers during a dry season. He has found that by planting onlons and notatoes in the same field in alternate rows the onlons, being so strong, bring tears to the eyes of the notatoes in such yolunes that the roots of the vines are kept moist and a big crop is raised in spite of the drought. It is time to commence putting out your ing with a man onion sets now. Reed City (Minn.) because she said Clarion.

LONELINESS OF GREAT CITY. No Interested Friends to Enter Into

If you live in a large city you are lost. You are swallowed up by ocean of people around you. go down into the deep and that's the last of you, except perhaps an occasional bubble that may come to the surface near where you were last seen, says the Fremont (O.) Post There ard so many people who can't escape drowning. You can't make friendships as you do in a smaller place, where the individual isn't en-tirely effaced by the mass. Society is not what it is in the smaller place, where the human element enters in altogether. In the larger place your newspapers, unless you are one of the financiers or packing-house
The births and weddings in your family are of no more interest utside_your_own_flat_than_are_the wreaths of smoke curling up into the mpyrean; no merry crowd of incongratulations. The deaths bring little sympathy from the rumbling, rat-tling world outside; no sorrowing acquaintances who have stood by you through the long sickness; there is little or none of that evidence of loving kindness that comes from neigh-bors and real friends in a small city or town, where the dollar mark is not everything. It is paradoxical law that where there are so many people there are fewer friends, and when you diminish the number to a frontier community where neighbors are miles apart your friends are ready to take their lives in their hands for you.

THE ONE THING HE WANTED.

Three Different Kinds of Soup Were Brought to the Guest.

After waiting the usual five or ten minutes the new arrival was served with the first dinner course of soup, runs a story in Judge's Library. Hesitating a moment as he glanced at his plate, the guest said to the walter: "I can't eat this soup.
bring you another kind, sir," said the
matter as he took it away. "Neither "I can't eat this soup." waiter as he took it away. "Neither can I eat this soup!" said the guest, a can I eat this soup!" said the guest, a er; second, to hold from those who trifle more emphatically, when the would take through force or fraud cond plate was served. The waiter. angrily but silently, for a third time brought a plate of soup, "I simply an't eat-this soup!" once more said the guest in a low, emphatic tone. By this time the waiter was furlous and called the hotel proprietor, while the guests at the near-by table looked over that way with curious glances, "Really, sir, this is unusual. May I ask why you can't eat any of our soups?" demanded the proprietor. "Be cause I have no spoon," replied the

Chosts at Sheepshead Bay.

fronts the Slough of Despond at Sheepshead Bay, and for several years was occupied by a coterie of Ammondenly disappeared, and his room was taken by an ambitious novitiate of the worthy and well qualified. Reggle was assigned to the room of the de-parted member, who is a noted aquatic athlete, stripping like a Mulbeauty who used to swim the Helles hetween Coney Island and Rock away Point to flirt with the mermaids on inlet reefs. The shosts got after Reggie the first night. He declares they toted him upstairs and made strange noises as the cottage reeled in the last stage of seismic torment, The Bay folk are much perturbed.-N. Y.-Press.

Chamola for New Zealand. An Austrian warship visited New Zealand last year. Its officers were Zearand hast year. Its univers were handsomely entertained and presented with a variety of local products and curios. In recognition of this hospitality the Emperor Francis Joseph has made a gift of eight chamois to the colony. The transportation of the animals to the other side of the globe was a risky undertaking, but it bas been successfully accomplished. The passage between the tropics was the crucial stage of the voyage, but the chamois were carefully shielded from the heat and emerged without any loss save a temporary one of appetite. New Zealand has snow-clad Alpine heights, where they will soon feel perfectly at home.

Mutual Recognition. An orator and lawyer who lives at lalesburg, lll., wrote a book which his publishers, in order to give the author an exact idea of how it would look, made up into a dummy with the regular cover, but with blank pages. The proud author went to Chicago and called on one of his friends, "George," said the author, putting the book open on the table, "so far as my acquaint. ance with literature goes, this book is best suited of any for your mentality." The other turned over the blank pages gravely. Finally he said: "Carr.-after a somewhat careful examination of this work, I am forced to the conclusion, without looking at the litle page, that you are the author."

For Her Sake. "So you quit smoking because she asked you to?" said the youth with the clam-shell cap. "Yes," answered the lad with the turned up trousers. "And then?" "Then she wont walk." ing with a man who smoked a pipe because she said it kept away mos-

WORK OF MAHOGANY HUNTER. Practiced Eye Needed to Locate the Valuable Timber

Mahogany trees do not grow in clusters, but are scattered throughout the forest and hidden in a dense growth of underbrush, vines and creepers and require a skillful and experienced woodsman to find them He seeks the highest ground in a fortree and surveys the surrounding. mahogany has a pe culiar foliage and his practiced eye soon detects the trees within eight. The axmen follow the hunter and then come the sawyers and hewers, a large mahogany taking two men a full comings and goings are not noted by spurs, which project from the trunk your friends even, and never by the at its base, and scanolds must be erected so that the tree can be cut off above the spurs. This leaves a stump ten to fifteen feet high, which This leaves a is sheer waste, as the stump really ontains the best lumber. The hunter has nothing to do with the work of cutting or removing the tree. his duty eing simply to locate it. If he is clever and energetic his remuneration mey amount to \$500 or \$1,000 a month, but he may travel weeks at a time without detecting a tree, and as earnings are rather precarlous.

PLEA FOR SELF-RELIANCE.

Charles G, Dawes' Good Advice to Young Men in Business.

This is a hard world in business. always has been and always will be There are many good and generous men in it. There are many who will lend a helping hand to you in your adwill not find them among the men who tried to get you to embark in speculation with your little surplus, ind to sell you something would help you to "easy money." Be self-reliant, Make your own investigation into investments. When you cannot, put your money in a good savings bank. Distrust the financial demagogues as you distrust the po-litical demagogue. Keep your hand on your pockétbook as you travel life —first, to give always in proportion to your means to those who are poor-er: second, to hold from those who what you need for yourself and yours. You will then, writes Mr. Dawes in the Saturday Evening Post, have your hand where most of the other fellows have only their eyes. In this alone you will have the advantage of them.

ingenuity in Stealing.

"What's all the row about?" the hungry man queried as the manager city restaurant-was-seen to and detain a departing individual. The waiter explained. For a month past some of the numbered checks had been missing, and it had been dis covered that certain patrons were economizing at the expense of the management. A man would order 15 cents' worth and receive a check for the amount. Then he would secrete looking and order a quarter's worth more of satables. The waiter would then give a check for 40 cents, but when it came time to pay the cus-tomer would use the 15-cent ticket to get by the door. "H'm," muttered the hungry man; "fine scheme," and in the excitement he passed a Canadian dime on the cashier.

the hypothesis that has been presented to me to the effect that your understanding of human speech is perfect, and in order to test this matter I wish that you would be good enough to bark three times in rapid auccession as an indication that your com prehension of my request is in all ways clear and lucid." "And did he bark?" said I to Teagarden, who was telling me the story. "No," said Tea-garden, "but he growled like"."

Citron Tree and the Bible Was the citron tree the tree of garden of Eden? Some persons think garden of sage. Some persons that it was, in any event, it appears that "citron" would often be the right rendering in passages where the authorized version of the Bible gives "apple." For instance, in the Brov. erbs, "A word fitly spoken is like apples of gold in pictures of silver." And in the Song of Solemon, "As the apple tree among the trees of the wood. so is my beloved among the sons." And again, "Stay me with flagons, comfort me with apples, for am sick of love"

His Discovery.
Cholly—You remember I told you yesterday—that Miss-Perkyns-told-me the night before that gas would marry me. Jack—Yes, Cholly—Well, happened to think this morning that she said that she would marry me on the thirty-first of September, so I looked up the calendar to see what day of the week it would be, and, do know, September has only, 80

Forgetting an injury. Church—I like to see a man who can forget an injury. Gotham-Well, there's that neighbor of mine; he's suing the railroad company for an in-jured leg, and every once and a while

WOMAN AND HER WORRIES. Fair Sex Criticized by a Writer in English Magazine.

It may fairly be said that women have only themselves to blame for a considerable proportion of domestic worry, with its consequences of irritability and bad temper, leading to-worse things, says a writer sell's Magazine. Even after fully rec sell's Magazine. Even after fully rec-ognizing that the ordinary housewife is specially subject, at any rate, at times, to unavoidable worry, we must surely grant that the common prac-tice of living up to the very limit of one's means, if not beyond it, is responsible for a great deal of woman's worry that might be avoided. One says, especially, woman's worry, be-cause it would appear that the wife, rather than the husband, is more often responsible for the neglect of that margin of income which, as Mr. Micawber knew, spells happiness. Hence it is worth while yet again to point out the commonplace factsthat the happiness attained by keep ing three servants when you can afford two is most lamentably outweighed, not merely by the worry in-volved in the incessant effort to make both ends meet, but also by the-consequences of that worry on sleep, health, digestion and temper—thes again, injuring every member of the family and possibly leading to its utter destruction.

MUSIC IN THE TYROL.

eculiar Charm of Concerts as Given by the Peasants.

There-is-a-slow-rising-scale_from the simplest summer music to the plendor of the Ring Bayreuth, or still higher, to an occasional Mozart fest the humblest beginnings, and Bayarian Tyrol. Taking a supper at the rough tables in the open air, in the midst of peasant gayety and the pretty colors of the costumes, we look, admiring, at the group of performers, sitting at a raised table, adorned in the full glory of the national dress feathers in the cap, brilliant waistcoat, trousers that leave a gap below the knee. One of the men plays the zither to the other's singing in a certain nar-row round of harmonies that seem to fit all the songs. For these vary really only in rhythm. Or the singers will and have suddenly changed into a band. However simple the music, there is always the old charm of the Tyrolese intervals and folksong.

Hugo's Beautiful Faith, Victor Hugo's confession of faith is going the rounds of the magazines and papers and is as follows: __"Just ure of the sun and bring to us, inpass, so the idea of God, reflected by loses, so to speak, the form of God brain. . . . In religion, I put God-above grave statement would be heard and understood seriously, I would say that I am of all religions. I believe in the God of all men, I believe in the love of all hearts, I believe in the truth of

all souls."

A Spider Factory.
In the forests of New Guinea there A Dog's Opinion of Beston Dislect.

"An intelligent looking dog," said the visitor from Boston. "Oh, he is," arcluimed Fido's owner. "He knows every word you say." Then said the visitor from Boston: "My canine visitor from contrivances, run to them joyfully.

Here, they think, is a fine net ready started. The outermost circle is already made. And they weave their en rings, and, when the nets are quite the insect workmen, and, taking up their spider-made nets, set off gravely on a fishing excursion.

> Modesty of True Greatness Abou Ben Adhem had just found out that his name led all the rest. "Still," he observed, with a modesty as rare as it was charming. "the sea lucky hits, it's true, but just as likely as not I shall he at the bottom of the percentage column in batting before the season ends." Smilingly accept ing the bouquet of put flowers sent to ling the bouquet of put flowers sent to him by an admirer in the grandstand, he steepped up to the plate, struck out, dodged a lemon thrown at him by a disgusted bleacherite, and went and took his seat on the bench.

You can't help the name you're born with save by a cumbrous legal pro-cess. A correspondent cycling in castern England has happened on a castern England has happened on a name which, for oddity, is hard to heat. From a shop window it was blasoned forth, in naked ugliness-Hogsflesh! How Dickens would have delighted in it! The owner is more heavily burdened even than the bear ers of Eheneser-on whose hard lo the window had recently something to say: more to be sympathized with than those Norfolk Howards who were once Buggs.—London Chronicle.

"Saw the process yesterday and he says he's going to run the devil-ant of town." "He's too late," said out of town." "He's too late," sai the woman of the house. "John le resterday!"—Atlanta Constitution. "John left

PIRE PROPRIES.

A GIANT COFFEE CORNER.

By A. W. Atwood. suppled to central the price of a commodity on anything like the colossal scale that is nov being resorted to by the government of Brazil, and a group of merchants and bankers asso cluted with it, to prevent a further decline in the price of coffee. On Aug. 6, 1906, the President of Brazil signed the so-called valoriza-tion bill, providing for a \$75,000,000 bond issue by the States of Sao Paulo, Minas and Rid, the three cof-tee-producing States of Brazil, and guipanteed by the general government. Already a large proportion of the general government. Already a large proportion of the loan has been placed, and with the proceeds about 7,500,-400 bars of coffee have been purchased by the government and set aside with the purpose of raising the price of coffee. Enemies of the valorization scheme assert that it shust ultimately fail, as anything in the nature of an atterented corner is sure to do, since it is contrary to the of political economy. The friends of the scheme deny that any effort is being made to corner coffe or to create a trust or monopoly in that commodity, and cer-tainly in spite of the heroic efforts that are being made to support the price of that article there has been no evidence in the movement of prices since the valorization law went into effect to warrant the assumption that any corner is likely.—Van Norden Magazine.

WOMEN NEED HIGHER EDUCATION. By James Bryce

It is true that the greatest geniuses have not been women. Perhaps they make a better showing against men world of affairs than in the world of mire thought, which seems odd when one considers how seldom they have had the chance of showing high statesmanship. But the argu ment that the greatest men have surpassed the greatest women really is onite beside the present question. tended for Plates, and Newtons, and Goethes. They are intended for

young persons of ability and intelligence above, but not necessarily far above, the average. It is enough for us to say that, taking all but the few leading spirits of each age, the faculties of men and women are practically equal generally similar. Women can do a great deal in rousing and shaping

omblic opinion. Women are quite as well qualified to ma better qualified to apply those principles in the daily work of acministration. They have more tact, more sympathy more patience, mere willingness to take trouble to com prehend the smallest details. Where the work to be done is for the benefit of children, and no work is more important, they plainly are the best fitted for it. America

in a position to maintain fri

never will forget what was done by the women who came from the North to teach the colored children after the Civil War.

Every one among us, young or old, man or woman ought to have some kind of interest, some line of study, or some form of practical work outside the direct and main business of his life, something to which the mind can turn for relief from that business. It often is hard secure this second outside interest, perhaps as hard for women as for men, because they are subject to more frequent demestic interruptions and are apt to be entangled in a coli of so-called social duties, mostly useless. But we must all try to secure it.

AMERICAN PATENT LAWS.

his fee is returned to him.

By Justice David J. Brewer. The whole system of the patent laws in this country is quite wrong. This is the way it operates: A man sends in an application for a patent. He has to pay a certain sum to have the patent granted him. It is a comparatively This, of course, is in addition to whatever be pays his agent or commissioner for securing the patent. Now, if the government finds that he is not exhibted to a patent

Now, look what happens under the present erroneous system of granting parents. The government does not want to refund the money, and in consequence the country is deluged with a mass of useless patents. The great majority of them are not original or are not inventions. They are only distorted applications of the real inven-tor's idea. This reckless and wholesale issuance of patents is a detriment to the genius who gives the world an invention. If his invention is of any real value there will be a thousand other men who spring up with slight modifications on it and also get patents. The real is thus robbed of the proceeds of his genius, and the United States is afflicted with continual and ceaseless litigation on the subject.

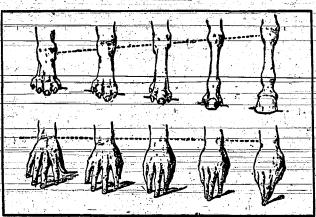

POSTOFFICE AND CRIME DETECTION.

By George B. Cortelyou. It will be readily understood that the guarding of the mails for the purpose of keeping at the minimum the manifold abuses to which they are inherently subject is a task of great magnitude; but it is being better and more efficiently done every year, affording much justification for the remark, which was made not long ago, that "the Postoffice Department of the United States is the most effective agency in the world for the detection and prevention of crime

and the apprehension of the criminal."-North American Review.

EVOLUTION OF HORSE'S HOOF.

ANIMAL ORIGINALLY HAD FIVE TOES, BUT FOUR WERE WORN AWAY.

The horse had originally five fully developed toes, but in the course of ages the two at each side your away; and the addle one was dereloped until it became the hoof, as it is now seen. The evolution of the horse's hoof is illustrated by the analogy of the human hand, where the middle finger represents the too of the horse which has remained in use. In the hoof of the modern horse two narrow splintbones still represent former toes.—Illustrated

this remedy have become a fixed re-The chemical product is known to

have antisentic and antimicrobic properties that are particularly energetic. The solution M. Truchet now uses is composed of 125 grams of potassium permanganate, 3 kilograms of lime and 100 liters of water. The mixture is prepared in earthen or metallic receivers. It is applied with a sprayer, and rather slowly. The vines are not inundated. When a coating is required the quantity is doubled. The treatment is also advantageous in preventing too hasty a growth.

In proportion as the reaction occurs the solution changes color, passing from violet to brown. After complete evap oration, brown traces are found on the leaves and fruit. These are quite characteristic, and are seen a long time. Tests according to the method ly extended, and have been made chiefin the skin. The owners of stray cows ly for odium and mildew. Its efficacy nay, therefore, not be considered as entirely demonstrated, for all the maladles of the vine, but there are grounds for the supposition.

Hoghouses.
Bulletin No. 109 of the Illinois Experiment Station discusses the location, construction and operation of hognouses. It gives numerous drawings and pictures to lilustrate the same, and

the bulletin is summarized as follows: 1. A hoghouse should be located so that it is well drained, well-lighted and gives access to pasture, good shade, pure running water and clean mud wallows.

2. The two principal kinds of hogcouses are the individual houses and the large houses with individual pens. Each has points of advantage.

3. For sanitation the building should be constructed so that it is dry, ventilated, free from dust and drafts, and so that the direct rays of the sun fall upon the floor of the pens at the time the winter crop of pigs is farrowed. These rays should also be excluded in summer

4. The building should be made serviceable by being built so that it can be used every day in the year, and be arranged so that the largest amount of work may be performed with the small est amount of labor.

5. For large houses, gates and partitions of wire are best, because they do not obstruct the light and heat rays from the sun, do not hide the pigs from view of the attendant, nor from ach other, and do not furnish lodgment for disease germs.

6. The large house is operated so that two litters per year are farrowed and grown for market, and so that the pigs are put on the market at the most favorable season.

This is a practical bulletin on a subject that should interest every farmer who raises hogs, as it contains many useful hints and suggestions about hoghouse construction.

Humus Holds Water. Decayed and decaying vegetable matter in the soil greatly increases the power of the soil to hold water. This is a fact of such large consequence that our agricultural scientists are paying more, and more attention to it. One of the professors at Cornell Uni-

versity undertook to prove the great r£ humus=as=r rifue of hunnis as a holder of water. He took two samples of soil from places about twenty feet apart. Everything about the location suggested that the If a cow's head is raised as high as two samples should show the same wapossible and her mouth kept open by ter content. But in one of the locathe drenching bottle or horn, some of tions three successive crops of crimson the liquid is very apt to pass down the clover had been turned under. The sample of soil from the place where causing instant death by smothering and at other, times causing death, to alvzed 8.75 per cent moisture: 1.91 per follow in a few days, from congestion cent humus and .12 nitrogen. The sample from the soil where the crimson clover had been turned under analyzed 15 per cent moisture: 2.94 per cent the medicine dry on the tongue. The humus, and .21 nitrogen. This was a gain of 6.25 in moisture content; 1.03 humus content and .00 nitrogen content. There are very few people that nose, at the same time opening the mouth and with a spoon, place the medstop to consider what this means on an acre of land. Taking the soil to a depth of six inches it means that this 6,25 per cent increased moisture would equal 93,750 pounds or 46% tons The American tobacco crop has well as the quantity has im-

This amount of additional water would mean a great deal in a dry season. The turning under of a occasional crop of some green stuff means much, if it does nothing else than hold up the water content of the soil. It would take a great deal of sprinkling from a hose tons of water. Many of the soils that are now unproductive would, sava Farmers' Review, be productive if they had enough water to carry them over the dry spell of summer. But by had farming methods the humus has been exhausted and this has reduced the capacity of the soil for carrying crops through the dry season. The crops start well in the spring and seem to be doing nicely till the summer dry spell begins, when they at once droop as if some insect were assailing them. The trouble really is that the mois ture supply was so light that it way soon exhausted and the soil could not supply more. This loss of water holds ing capacity has really been at the bottom of numerous crop fallures in dirferent localities. The humus supply of the soil can be kept up by growing deep-rooting-crops-and-by-fertilizing them so heavily that they will develor W. Charles Truckot, instituted first in great masses of roots. The plowing un-1901, the employment of potassium der of crops grown for the putpose, of course adds much humus to the soil. unladles of the vine, has attracted but most farmers do not like to los more and more attention among ad- the use of the land for even a season. vanced cultivators. A Most Valuable Agent.

The glycerine employed in Dr. Pierce's medicines greatly enhances the medicinal properties which it extracts from native medicinal roots and holds in solution much better than alcohol would. It also much better than alcohol would. It also possesses medicinal properties of its own, being a valuable demulcent, nutritive, antiseptic and antiferment. It adds greatly to the fliency of the Thing Cherrybark, Bloodroot, Golden Seal root, Stone root and Queen's root, contained in "Golden-Medical Discovery" in subduing chronic, or lingering coughs, bronchial, throat and inng affections, for all of which these agents are recommended by stand-these agents are recommended by stand-

caronic, or lingering coughs, broachial, throat and lung affections, for all of which these agents are recommended by standard medical authorities.

In all cases where there is a wasting away of flesh, loss of appetite, with weak stomed, as in the early stages of consumption, there can be no doubt that glycerine facts as a valuable nutritive and aids the Colden Scal root, Stone root, Questia root and Black Cherrybark in promoting digestion and building up the liesh and stringing about a healthy condition of the whole system. Of course, it must not be effected to work miracles, It will not cure you sumption except in its earlier stages. It will ture very severe, obstinate hangem, chronic coughs, broachial and brityngest troubes and cironic soft its not so effected to work miracles. It will not cure you sumption except in its earlier stages. It will ture very severe, obstinate hangem, chronic coughs, broachial and affective in the same chronic soft its not so effective. It is in the lingering hange on coughs, or those of long standing even when accompanied by bleeding from lungs, that it has performed its most marvelous cures.

NATIONAL RICHNESS GROWING UP FROM THE SOIL.

CROPS ARE ALL BIG.

Reports Show that Predictions of Disaster Because of Frigid Spring Were Unfounded-No Doubt About Wheat-Corn Only Backward.

who saw distress and financial ruln for the farmers of the United States and because of their hard times a stringency for the whole population of the country, have been put to rout by reports of crop prospects received in Chicago. The late spring, with its accompany

ing chilly blasts, which lingered until the beginning of summer, furnished many prophets with dark visions for the future, and the story of the com-plete—fallure—of—all—the—important erops was handed about as an estab lished fact. Just how far these false prophets-failed has only recently come to light in the cheerful reports from practically every section of the United

Stories of the prosperity ne hand for the American farmer-a prosperity practically sure to be refleeted-to-all-classes of citizens—came from the editors of various farm weeklies and periodicals devoted to crop conditions.

Only in the case of corn does there seem to have been any appreciable effect from the bad weather of March, April and May, And even-the corr crop is said to be merely a backward one, with a tendency to be underde-veloped, but a sauguine hope is entertained that it will come around in time to maintain its place among the Indiana, and the southern states sufprobably the most with corn crops, but these probably will be offset by the bumper crops expected from Nebraska, Iowa and Illinois. of the greatest producing state

for the grain. Practically nothing but cheering As old Farmer Mullins urged his horses up the steep ascent of a Vermont Mil ho-observed that one of the new boarders news has been heard from the all twthe of horse as it labored to do its ress of the crop and its attendant that some o', you city folks think it Minnesota, the Dakotas, Missouri, and kinder tough to make these critters take the far northwestern states. Rumors and while it is admitted that the insect_did_a_deal_of_harm_in_Oklahoma and the Indian territory, its appearance in other important wheat growing states was short and the damage

> The weather has been of a variety calculated to give the boll weevil, the terror of the cotton fields, not even a farmers are correspondingly happy.

> Reports from Many States. MINNISOTA—The farmers apparent a thing as a late spring and are going ahead with chthusiasm. The prospects for the wheat crop are especially prom-

> NORTH AND SOUTH DAKOTA-Conditions were never surpassed, with the possible exception of the low lands. There the crops have suffered slightly on account of the unusual rains, but elsewhere there will be at least an average wheat-crop, if nothing better. The yield of oats, barley and flax will stand high in comparison with recent years, especially when the acreage is taken into considera-

ion.
IOWA—In most sections the crops are better than they have been in years. Late rains did some damage, but not enough to affect the general outlook. Corn. the big lowa crop, will be above the average, and one expert has boldly declared

he yield within the State will be on 300,000,000 bushels. There will probably be a normal yield of oats, amounting to about 150,000,000 bushels.

ers are as happy as they have been in a

The present pay is 45 if the yield would be short, but good, steady weather around the first of July did the work, and now a humper run is in With an increased acreage of sight. wheat, there will be an average crop, and the yield of alfalfa will also be great. The ranges are reported in excellent shape.

"About the quality of the water. It's alsgraceful. Why, I deterted a distinct of both timothy and clover bay, and plen-ty of oats and rye is the story of the

friers. The coru is keeping up well andfruit alone is in bad shape.

INDIANA—Records of lass as well andhardle be bucken, but the crops will fur
exceed the enryl expectations. Corn and
outs are—alitele—behind—the—average, butthe other fold core was a but to conthe other-field crops are about equal-to other years. The fruit crop is below the brave one to own up to it when it is accomplished."—Washington Star.

OHIO As a whole the crops are about the average. In some sections the pros-pects are away above the normal, but in others it is amorent there will be docreases in the yield, all tending to even up matters.

TENNESSEE—All the crops are late equiso of the oping, but prospects point to a crop of nearly av-

erage yield.

MISSOURI—Despite the disheartening predictions for corn growers, an expert says the crop is only seven points behind last year. The out crop is the best in years, and wheat is about the average KENTUCKY—Plenty of late vegetables is the story of the farmers. The early, outlook was anything but satisfartory, but the situation has cleared to a tonsiderable extent. The corn crop is responted in excellent shape.

VIRGINIA—The tobucco crop is late and will be off in quality and quantity.

VIRGINIA—The tobucco crop is late and will be off in quality and quantity. Corn is also late, but is rounding to in good fashion in the hot weather. There is a good crop of hay, and feed for steek is said to be plentiful.

LOUISIANA—Rice, the principal crop, is in splendid shape with all prospects pointing to a big yield.

THEXAS—With 4,000,000 bales of cort ton and 155,000,000 bales of cort night, the outlook is highly encouraging. Rayge conditions are said to be better, then they have been in years, and the

thin they have been in years, and the small crops, such as peanuts, sweet po-tatoes, rice and alfalfa, are in excellent

ALASKAN FARMS.

Nearly 5,000,000 Acres Soon to B

Opened for Settlers.
At a distance of some 50 miles south of the Arctic Circle 2,980,000 acres of land will be opened for settlement in Alaska on Sept. 30, by a recent order of the Secretary of the Interior. This great tract has been field in reserve for a national forest around Norton bay, but the project was abandoned, so many were the demands for entry on land which had been found more suitable for settlement. The spring rush for Alaska overwhelmed stemaship accommodations and filled up the wharves at Scattle with household freight, but the order of the Secretary is freight, but the order of the Secretary is expected to prolong the rush up to the approach of winter. Alaska has been in the throes of a general strike and ticup, but as usual in such cases this feature is wearing itself out. These trou-bles were caused by the shortage of abor in southeastern Alaska, owing to the ac-tivity of railway building and the development of new mines, culminating in a general demnid for higher wages.

Agriculture is proceeding hand in hand with the efforts of government experiment

stations, which are constantly determin-ing what will grow which heretofore has been exotic to the soil. So, far, all the hardler vegetables have been made to thrive, and in the large valleys of the interior experiments are being made, with every prospect of success, to grow hay, grain and stock feed capable of maintaining work animals. The great valley along the Susitna river in central Alaska, extending north from Cook's Inlet and Res urrection buy, it is declared has a mild climate all the year, owing to the warm currents of the ocean, and will grow almost anything that is raised in ter

zones,

The permanent white population of Alaska is now 33,000 with 6,000 nomado at work here and there. The increase now averages 3,500 souls a year, a figure which the coming opening of lands is expected to swell uniterially. These peop shipped to the States last year \$29,330,-280 worth of, gold, silver, copper and morchandies in-the form of-fish products.
Cable, telegraph and mail connections are being generally extended and already Alaska is ambitious to become a State.

Alienists for Mrs. Eddy. Dr. George F. Jelly, the Boston mental specialist, and Dr. G. A. Blumer of Prov-

APPALLING PIGURES ISBUED IN PENNSYLVANIA.

In order to protect the grave of her mother and to keep the government from despoiling it. Miss Lydla Conley, the only Indian woman lawyer in the country, has erected a cottage in the center of Huron cemetery in Kansas City, Kan, and with a shotgun will drive off those who attempt to take possession of the property. Uncle Sam has undertaken to sell the property, which is the inst resting place of the old and famous tribe of Wyandot Indians, which once occupied the whole Official Report for the State Giver 1,000 as Year's Casualties, Leaving Nearly 1,000 Widows and 3,400 Orphans-Brief News Notes

More than 1000 persons were killed last year in the coal mines of Pennsylvania, decording to the annual report just issued by Jimes Roderick, chief of the department of mines. The statistics sho department of mines. The statistics show that of 55T persons killed at the anthractic mines 274 deaths were the result of the victims' carelessiess; 69 to the carelessiess of others, 188 unavoidable and 28 resulted from accidents for which responsibility-could not be fixed. Of the 477 killed at the bituminous mines 307 victims died from their own-carelessiess. victims died from their own carelessness, 10 by the carelessness of others, 142 were unavoidable and 18 dead by accidents for which responsibility could not be placed. The chief says that the figures show that two-thirds of the accidents resulted from the victims' own carelessness and that the remaining third may be taken as the reasonable percentage of accidents to miners. It seems impossible to adopt any method," he said, "either, by legislative enactment or by special rules that will tend to lessen the loss of life among the mine workers." The accidents left nearly 1,000 widows with 3,410 chilren under 14 years of age. A great deal could be done to allevinte the distress, the chief says; if the uge limit for the employment of boys inside the mines were wered-from 16 to 14 years.

LIVER LOBT AS BOAT BURNS

Temen and Children Jump Into Wafer in New York State to Pante. Notable examples of herolest, as well is a few examples of cowardice, attended the burning and sluking of the steamer Frontenae on Cayuga lake, New York, Saturday. The death list is believed to be limited to eight, the number list reported. A search along Cayuga lake and in and underneath the chaired hulk of the steamer failed to reveal any more bodies, and the officials think that no more lives were lost. No inquiries have come in to Ithaca or Union Springs for

ersons not accounted for. The accident happened about two miles south of Union Springs. Just before the boat reached Aurora about fifty persons were ready to go aboard, but the high wind prevented the boot from landing. This undoubtedly saved many from death. The fire was started by throwing a cigarette or match into the companion-

vay.

One of the most pathetic incidents was the death of little Grace Abel. He grandmother jumped with the child hel close in her arms. She was rescue while at the point of death and her first exclamation was, "I am so glad the baby has been saved." Yet the child had been dead for some time.

Notable examples of heroism were

prevalent on all sides. Little Frank Al-cott, 12 years old, towed his grandascher ashore on a life raft with the simple remark, "I paddled my hardest to save my grandsnother, begause she was alone and could not swim." Roland Genung, son of Sheriff Genung, absolutely refused to leave the boat without his mother. Both were saved. Mrs. Tuthill, a woman of 70. jumped overboard with her daugher and both reached the shore in safety. that here and there in the gathering there was a cowardly heart. For there were men on the steamer who thought only of their own safety, and not only refused to assist the helpless women and children, but netually thrust them ruthlessly aside

SENATOR PETTUS IS DEAD.

BOLT-EXPLODES DENAMITE

Four Lives Believed Lost When Lightning Strikes Hardware Store. Three and possibly four persons lost bardware store of W. S. Hemingway at Otter Lake, exploding a quantity of dynamite. The dead are Maynard Heming way, aged 30, who clerked for his brother and Maynard Hemingway's wife and 5-year-old-daughter. It-is reported that a customer was in the store at the time, but this cannot be confirmed. Heming-Way was alone in the store when a terrific electrical storm arose. His wife became frightened at the vivid flashes, und taking her little daughter with-her went over to stay with her husband. The storm was at its height when a bolt struck the building. There was a terrific peport, immediately followed by another as the dynamite exploited. The two-story frame building instantly became a mass of flames that raged so facrely it was impossible to make any efforts to save the bodies of the victims.

OLD NAMES FORGOTTEN.

But Railway Mail Clerks Get Letter

Through All Right.

It is said that a Reading man recently received a letter addressed to him at "Busswood Corners," which was the former name of the town before it put on long pants. It is a long time since any mail designed for Albion has been direct to the long that long the long the long that long the long and designed for Albion has been direct-ed to "The, Forks," but not so long that a lady in the Luke Shore depot there called for a ticket to Oyer's Corners," "Madam," said the ticket agent, "there, is no such station on the road." "Give her a through-ticket to Springport," suggested a bystander, "and it will be all right."

It is said that the railway mail clerks on the Michigan Central are no longer puzzled over Ceacker Hill mail, but put it in the Parine pouch, and that every-thing for Hipslantee, Ipslianty, etc., goes

FIX BLAME FOR DEATH OF GIRL

Michigan Legislator to Be Arreste

on Charge of Manslaughter.
Prosecuting Attorney Robison announced in Detroit at the inquest into-the death from an operation of Miss Edith Presicy, proctreader for the State Senate, that he would issue a warrant for Representative Charles E. Ward, Speaker pro tem. of the House of Representatives harging him with manslaughter in co nection with the girl's dentil. Mr. Ward has been in Duquoin, Ill., for the funeral of his father, and he was given time to return and accept service. A warrant was issued for Dr. George A. Fritch of Detroit. The coroner's jury in the case brought in a verdict finding that Miss Presley came to her death by an operation by Dr. Fritch. As to the accessories the jury begged to leave an open verdict,

THE SKIN FAMINE.

Long Gloves Have Caused a Great Shortage United States Consul

Reports.
Consul C. P. H. Nason, of Granoble furnishes a review of the business of that French district for 1906. The following paragraphs are taken from the

consul's report:The-total-value-of-merchandise-ex ported to the United States through Grenoble in the year ended December 31, 1906, was \$3,138,246, an increase of \$1,354,900 over 1905. The principal articles of export to the United States were kid gloyes and walnuts. These two aggregated \$2,502,812 last year. Of kid gloves the value was \$1,956,472. which is nearly equal to one-half of the entire value of kid gloves imported from France during that year.
"The kid glove industry, of which

Grenoble is the center, has been mark ed by unwonted activity. For several 'years prior to 1905 there had been a gradual decline in the demand, if not in the use, of ladies' kid gloves in the United States. This was largely due to the growing outdoor use, especially in the warmer season, of the so-called fabric gloves, gloves made of liste thread, silk, etc., and which had been greatly improved both in design and finish. Fashion then decreed a shorter sleeve to the woman's dress, both for followed, and still continues, the reign of the long kid gloves. White was at first the prevailing color, but later the preference was given to black and what is known as the tan shade. Gloves in these colors, from moderate to extreme lengths, have gone forward as never before to the United States. This demand has put an unwonted strain upon the skin markets, and not only France, but all other kid producing countries, have been ransacked to-find<u>the-coveted material</u>, the more so because the longer gloves call for skins of double length, or two skins ordinary length. In consequence the prices of kid and lamb skins have tended steadily upward, until there ha been almost a panic in the skin mar-

Ret. "This naturally has accrued to the greater profit of the skin merchants, skin gatherers and growers. The larger mamifacturers who were fortunate have also profited. It has been hard est on the smaller manufa who have been forced to buy their skins at current rates to meet previnsolence of this language, is so far as it. ers. Retail prices of gloves have may be almed at the present occupant of necessarily advanced, but not in prothe bench, the court can, of course, only portion to the rise in prices of skins. These within a year have doubled and even more than doubled. And this condition of things has only been intensified by the use of skins for oth er purposes thann gloves, and by the dearth-of-material-in-thej-world leather market, pushing the price of all kinds of leather up notch by notch.

DEATH IN YELLOW FLOWER.

Weed-That Has Caused Loss of 4,000

Dr. George L. Glover, head of the eterinary—department—of—the—State-1870— Agricultural College, and Dr. Lamb. State Veterinary Surgeon, were here today to investigate the cause of the death-of-150-head-of-cattle-on-the range on the Horsefly.

They found after a personal examination of the places where the cattle died that death was undoubtedly caus ed from a bulb plant carrying a ye low blossom, which is called death carnan. It was found to be growing luxuriantly surrounding the dead cattle, and Dr. Lamb expressed the opin ion that there was sufficient poison in one blossom to kill several neoble He said an animal after ceting one of

these blossoms would die in less man cera of an animal with them and will have it analyzed, in order to report to the ranchmen here an antidote which can be administered which will save the cattle when closely guarded. Campaign Expenses Limited. Gov. Hughes has signed the bill amend ng the New York penal code so as to limit the expenses of candidates for public office. The maximum in the case candidate for Governor is \$10,000, n for any other elective State office \$6,000.

San Francisco's New Mayor

Coincident with the announcement from the district attorney that the "reign of the big stick is at an end in San Fran-cisco," the Board of Supervisors elected Dr. Edward R. Taylor Mayor to fill out the unexpired term of Schmitz. Dr. Tav lor, who is well known in the West as lawyer and writer and as donn of the Hastings Law-School of the University of California, also took his degree as a physician. He has been prominent in civic reform work for many years and promises to give the city a non-partisan administration.

HS USEFUL STRONG HEAD.

Negro Proved Himself Just the Right Man in the Right Place.

Ever take notice how strength a negro has in his head?" said a man who is always looking out for unusual things. "Well, I had ample opportunity to test a certain negro's head-carrying capacity while men employed by the firm seemed able to handle the bundles. Of course we should have had a freight elevator, but we had none. Well, about the time I had given up hopes of getting the paper up to the third floor a negro came shuffling down the street. playing a harmonica. He inquired if I wanted any one to do a day's work, and said he was a hodcarrier, but was willing to do anything for a dlolar. I thought of the paper and the third floor proposition and engaged him. Well, sir, he took to it like children to candy. Maybe he didn't shame the rest of the negroes around the plant! In less than no time he had the paper stored away, and the work didn't to affect him in the least. The result was he got a steady place and gas-dubbed-the-Henvyweight-Nigger e-fellow, toted-every ounge of it on his head."

NO SENTIMENT IN BUSINESS.

Some Old-Fashioned Ideas of Trading Have Passed On.

"Times have chapged," said an old grocer on Kansas avenue, the West side. "Buyers get their groceries. meats and merchandise where they believe they can get the most for their money. Of course, quality as well as quantity is considered. Twenty years ago it was different. chants often were patronized because they were of a particular nationality Sometimes it was on count of their political belief. Then there were those who had the notion that a store they had patronized sevyears gave the most for the just moved into the neighborhood. came into my place of business sev-eral years ago. He asked me about nationality. I told him. He walked out of the store and never release it is, to be sure, a recognized fact years later, came under the hands of turned. But it's different now. Relation that the women give more trouble the wreckers, and the Dickens slab nationality and politics are forgotten. Honest bargains and honest methods are sought. And it is better for the buyer and merchant. Kansas City Star. 1-

His Finger Imprints.

nonument was recently unveiled at Buda-Pesth, the Neue Presse gives the following incident: Count Andrassy had a habit of smoothing with his hand his richly oiled hair. One day an important document had passed the Austrian council of ministers, in the contents of which Count Andrassy was interested. Shortly afterward the Austrian president of the ministry said to one of the ministers: Count Andrassy has read the latest find on it the imprint of Count Addrassy's fingers," responded the president with a laugh.

"Sensible to the Last."

with whom she lived that her death would probably be sudden, and one day he was hurriedly sent for, as she appeared to have become unconscious. the old lady was dead, and, taking hold of her right hand, which was ed, but not rigid, he calmly exracted_from_it_the_foe_which_she had provided for him, and as he did erals.

The Ideal Eve.

future wife in the surroundings of the ordinary girl. Where is the Adam who dreams of meeting his Eve, short of skirt and strong of arm, in the ckey field; or striding over the turf with a golf ball; or plunging madly-after-a-tennis-ball? Au-contraire, he pictures her clad in "something soft and clinging," a being more angel than woman, who, as a daily companion, would indoubtedly prove be cursed with .- The Throne.

South American Oil-Birds.

One of the animal curiosities of South America is the "oll-bird," or guacharo., It breeds in rocky caves on the mainland, and one of its favrite haunts is the Island of Trinidad It lays its eggs in a nest of mud, and the young birds are prodigiously fat. The natives melt the fat down in clay pots and produce from it a kind of butter. The caves inhabited by the birds are usually accessible only from the sea, and the hunting of them is sometimes an exciting sport.

Wealth and Generosity.

cause it makes generosity impossible. There can be no generosity where there is no sportfice; and a man who is worth a million of dollars, though he gives half of it away, no more makes a sacrifico than (if I may make such a supposition) a dropsical man, whose skin holds a horshead of wa tor, makes a sacrifice when he is tap-ped for a barrel. He is in a health-
